Name _____

1. Skim through this assignment sheet <i>before</i> you read the article.
2. Give five or six bullet points that summarize your article.
3. Summarize the article in a single, complete sentence.
4. Give two or three bullet points summarizing the <i>nuclear science content</i> of your article.
5. What are two or three social / political / economic (non-science) issues that your article deals with?
6. List two or three (or more) words that you don't know from your article. Then define those words.

7.	List three or four things that you don't understand from your article or questions you want to know after reading the article.
8.	Choose a quote from your article that you think is important. It could be the main idea. It could be the most frightening thing in your article. Write that quote and then a few sentences explaining why you think the quote is important.
9.	Find a student who read a different article. Have them explain what their article was about and write s two- or threesentence summary of their article. Do NOT just have them hand you their paper so you can copy their summary.
